

## Test Execution Worksheet

Test Description: TD-002

Application Version: V0.9.29

Date/Time: 3:00 15:10 4/2/17

### Repeatability Instructions:

In the event an off nominal or failure occurs, please provide information that allows the situation to be recreated in its entirety, items below may provide some assistance in documentation for repeatability.

- List the step where the failure or off-nominal situation occurred
- If possible to do safely, confirm if the situation can be re-created by going through the steps.
- List an additional steps/circumstances surrounding the failure/off-nominal situation if the test description was not followed verbatim.
- Provide screenshots/video if possible to document off nominal situations if it cannot be properly captured using notes.

Passed     With exceptions (list below)  
 Failed

### Notes:

- when activating trial license, although activated, it didn't close the software activation window
- In trial mode, usb filtering was not active and disabled,
- trial mode time limit was 30 days, should be 7
- upon successful full install, software activation doesn't automatically exit or show it was activated
- client plus full activation failed, error 70  
Developer " "
- Trial mode doesn't update correctly, & post deactivation
- Only Trial & client works correctly

## Test Execution Worksheet

Test Description: TD-003  
Application Version: v. 0.9.29  
Date/Time: 15:24 1/2/17

### Repeatability Instructions:

In the event an off nominal or failure occurs, please provide information that allows the situation to be recreated in its entirety, items below may provide some assistance is documentation for repeatability.

- List the step where the failure or off-nominal situation occurred
- If possible to do safely, confirm if the situation can be re-created by going through the steps.
- List an additional steps/circumstances surrounding the failure/off-nominal situation if the test description was not followed verbatim.
- Provide screenshots/video if possible to document off nominal situations if it cannot be properly captured using notes.

Passed     With exceptions (list below)  
 Failed

### Notes:

- when resizing the select interface, there's strange flickering (Lobisgaw?)  
- would be useful to have confirmation inputs on manual operations?  
- weirdness in target selection with crosshair on(?) also target has  
multiple interfaces, maybe an API sync key issue (Maybe some subset/reduce?)

## Test Execution Worksheet

Test Description: TD-004

Application Version: V0.9.29

Date/Time: 15:30 1/2/17

Repeatability Instructions:

In the event an off nominal or failure occurs, please provide information that allows the situation to be recreated in its entirety, items below may provide some assistance is documentation for repeatability.

- List the step where the failure or off-nominal situation occurred
- If possible to do safely, confirm if the situation can be re-created by going through the steps.
- List an additional steps/circumstances surrounding the failure/off-nominal situation if the test description was not followed verbatim.
- Provide screenshots/video if possible to document off nominal situations if it cannot be properly captured using notes.

Passed     With exceptions (list below)  
 Failed

Notes:

• add FPGA button doesn't react once checked, may not be inside event structure or set to catching mechanical action  
\* Error when trying to copy over file, looks like it has a bad path, may be specific to RTE,  
- still get error on cancel too? (error 43)  
- able to copy manually to desktop and reburn

## Test Execution Worksheet

Test Description: TD-007  
Application Version: v 0.9.29  
Date/Time: 15:43 1/2/17

### Repeatability Instructions:

In the event an off nominal or failure occurs, please provide information that allows the situation to be recreated in its entirety, items below may provide some assistance is documentation for repeatability.

- List the step where the failure or off-nominal situation occurred
- If possible to do safely, confirm if the situation can be re-created by going through the steps.
- List an additional steps/circumstances surrounding the failure/off-nominal situation if the test description was not followed verbatim.
- Provide screenshots/video if possible to document off nominal situations if it cannot be properly captured using notes.

Passed     With exceptions (list below)  
 Failed

### Notes:

• when selecting targets for component, targets aren't filtered by product  
- seems to be intermittent, off by 1?  
• Network doesn't remain open if opened  
• save doesn't default to config saved to center  
• error on cancelled save  
• File dialog button should read save

## Test Execution Worksheet

Test Description: TD-009

Application Version: v 0.9.29

Date/Time: 15:51 1/2/17

### Repeatability Instructions:

In the event an off nominal or failure occurs, please provide information that allows the situation to be recreated in its entirety, items below may provide some assistance is documentation for repeatability.

- List the step where the failure or off-nominal situation occurred
- If possible to do safely, confirm if the situation can be re-created by going through the steps.
- List an additional steps/circumstances surrounding the failure/off-nominal situation if the test description was not followed verbatim.
- Provide screenshots/video if possible to document off nominal situations if it cannot be properly captured using notes.

Passed     With exceptions (list below)  
 Failed

### Notes:

• would be nice to be able to synchronize multiple targets  
• Return entry logic for validator doesn't work when IP/subnet mask are left empty (static mode)  
• save composition doesn't occur minimized (you see command window)

# Test Execution Worksheet

Test Description: TD-010

Application Version: 10.9.29

Date/Time: 16:32 1/2/17  
44

Repeatability Instructions:

In the event an off nominal or failure occurs, please provide information that allows the situation to be recreated in its entirety, items below may provide some assistance is documentation for repeatability.

- List the step where the failure or off-nominal situation occurred
- If possible to do safely, confirm if the situation can be re-created by going through the steps.
- List an additional steps/circumstances surrounding the failure/off-nominal situation if the test description was not followed verbatim.
- Provide screenshots/video if possible to document off nominal situations if it cannot be properly captured using notes.

Passed     With exceptions (list below)  
 Failed

Notes:

• workflow on multiple target would be correct/fail  
 \* Don't think access authentication works correctly  
 • For multiple targets, would be nice to know which target it was  
 correctly in (i.e. target X not Y)  
 • error on startup application concerning dependencies or startup application  
 - error text is generic and not indicative of what failed, in the command  
 name, not the process  
 • should be able to accept startup w/dependencies (check?)  
 • Errors on EPBA Download, didn't get passed second target
